

RURAL ACTION COMMUNITY BASED ORGANISATION (RACOB AO)

ANNUAL REPORT 2013

Bringing Hope to the Community

ANNUAL REPORT 2013

The Safe Sail Boat on Lake Kacheera with Health Workers carrying out HIV Counseling and Testing services to remote fishing communities.

STATEMENT FROM THE CHAIRMAN OF THE BOARD:

Rtd. Rev. Dr. Samuel Cephas S. Kamyia

Dear readers,

I welcome you to this edition of RACOBABO Annual Report. We embark on our activities for the year 2014 amidst major changes in the organization:

A change in top management at the head office.

A creation of a liaison office in Kampala for easy contact with partners and other NGO's. Extension of our operational area to cover the districts of Sembabule, Kalungu, Kalangala and the Teso sub region.

Broadening our focus to include Peace Building, Good Governance, and Human rights.

All those changes are a testimony to our proven maturity from a local, one district NGO to a national

fully fledged NGO. And as we look forward to an exciting new future, it is comforting to know that we have the support of our funding partners. This is a tribute to good management and good team work by all our staff as well as sound guidance by the Board. All this is confirmed by a clean financial audit report for the year 2013 and a reassuring Organisational Capacity Assessment report recently issued.

As we salute the outgoing Director, Mr. Senkima and his team for ably nurturing RACOBABO from infancy to maturity, let us all resolve to rally behind the new team and its leader, Mr. Haq Makumbi as they take on the new challenges and give them all the necessary support. It is my sincere belief that RACOBABO will continue to grow even stronger and that communities we are committed to serve will increasingly benefit from our determination to deliver to quality services. All this is possible with God's guidance and support. God bless you.

"This is a tribute to good management and good team work by all our staff as well as sound guidance by the Board."

WORD FROM THE DIRECTOR:**Mr. Haq Makumbi**

RACOBABO has come to the end of the 6th year of operations stronger and well-grounded in the areas of operation. Some of the opportunities for successful implementation of the projects this year have included enthusiasm of communities towards RACOBABO programs, continued good working relations with all stakeholders, good relations and communication with funding partners, collaboration and networking with other like-minded organizations, involvement of and strategic guidance from the distinguished RACOBABO Board

members, and continued motivation and capacity building of staff.

We are especially grateful to our funding partners who enabled the achievement of the numerous changes we are beginning to see. Our clients have been empowered into more active citizens and they continue to engage duty bearers demanding for the required services. RACOBABO also built the capacity of duty bearers and are now more responsive towards fulfilling their legal mandates leading to better service delivery.

In 2012, the Board of Directors sanctioned the new strategic plan that opened up RACOBABO operational scope beyond the traditional Lyantonde/Rakai. Pharmacists without Borders - Sweden (FuG), has since granted RACOBABO a 2 year project for 2014 and 2015 to be implemented in Sembabule district. Similarly, RACOBABO was invited to the Teso/Karamoja Peace Initiative Program (TEKAPIP), a local NGO operating in that region. TEKAPIP and RACOBABO have since agreed on joint fundraising and implementation of HIV/AIDS programs alongside Peace and Recovery efforts.

Given the anticipated level of growth as well as the ongoing changes, RACOBABO conducted an organizational capacity assessment (OCA) to identify strengths, weaknesses, threats, and opportunities. Dan church aid provided funds for the exercise which resulted into an organizational development and capacity building plan whose implementation is already underway. We also thank DCA for the support towards acquiring a New Vehicle and other assets.

Allow me to salute the Board for their unwavering support to the management of RACOBABO. The year 2014 presents more opportunities for growth. As we move forward, I call upon fellow staff and our strategic partners for renewed energy. Your support and commitment towards the delivery of quality projects to the rights holders is paramount.

ORGANIZATION OVERVIEW:

VISION:

A Uganda where all people are living a dignified life and are actively participating in the development of their communities.

MISSION:

RACOBABO is a local NGO that is committed to the full realization of Health Rights and entitlements of the vulnerable persons in the targeted districts. We do this through empowering communities to promote the demand-side of accountability and delivery of accessible, quantity and quality public services and building capacity of relevant duty bearers to appreciate and fulfill citizens' rights of, especially, the most vulnerable men, women, boys and girls.

THEMATIC AREAS:

- *HIV prevention, care, and support*
- *Advocacy and Human rights protection*
- *Water and Sanitation*
- *Nutrition and Food security*
- *Household and Community Economic transformation*

RACOBABO'S CORE VALUES ARE:

- **Transparency**
- **Accountability**
- **Justice**
- **Participation**
- **Quality**
- **Professionalism**

RACOBABO STRATEGIC PARTNERS AND NETWORKS

- * **Lyantonde & Rakai Local Governments**
- * **Child Aid**
- * **HURINET**
- * **AGHA**
- * **DENIVA**
- * **Churches United against HIV/AIDS**
- * **Kitovu Mobile**
- * **CIPA**
- * **RACA**
- * **Salama Shield Foundation**
- * **Lutheran World Federation**

TARGET POPULATION

- * **OVC (Especially from Child headed households)**
- * **PLHIV**
- * **YOUTH (Especially out of School)**
- * **MARPS (Commercial Sex Workers, People in Fishing Communities, Riders and Long distance Truckers, People in long term relationships.**

PROJECTS IMPLEMENTED IN 2013

The WATSAN (Water and Sanitation) Project:

Funded by Icelandic Church Aid. This Project enabled the construction of 7 houses, 7 latrines, 7 kitchens, and 7 water tanks benefitting over 50 PLHIV and orphans from Child headed households.

Kawungu's Family Before Aid through RACOBABO.

Kawungu's Family After Aid through RACOBABO.

Strengthening Community structures for sustained ART provision in Lyantonde dis- trict:

Funded by Pharmacists without Borders, Sweden. This Lyantonde ART Adherence Project seeks to reinforce adherence among people living with AIDS on ART. This Project ended in 2013. A replica is to be implemented in Sembabule beginning 2014.

Strengthening Communities against HIV/ AIDS, GBV and Discrimination (SCAAD) Project:

Funded by Dan Church Aid aimed at strengthening capacity of duty bearers to fulfill their mandates as well as empowering rights holders to claim for their rights against harmful cultural practices, sexual and gender based violence, and discrimination.

A Community Barazar conducted to sensitize rights holders on how to claim for their rights against harmful cultural practices, gender based violence and discrimination.

The Livestock Project:

Funded by the Evangelical Lutheran Church in America (ELCA) where RACOBABO aims at re-building the socio economies of HIV/AIDS vulnerable Households especially those that were shattered by the epidemic through the provision of over 360 local goats.

Abel, an orphan who lost his parents to HIV/AIDS receiving goats

The Strengthening Community response against HIV/AIDS project:

Funded by the Civil Society Fund (CSF). Using the new HIV combination prevention strategy in four sub counties in Rakai district; Lwamagwa, Dwaniro, Kacheera and Kagamba. The Project targets MARPS (commercial sex workers, fisher folks, truck drivers, Boda boda cyclist, youth out of school, people in long-term relationships and People Living with HIV/AIDS).

Women, men and children accessing HIV Counselling and Testing services at Lwebiriba landing site

Strengthening community child rights protection structures in Lyantonde:

Funded by Independent Development Fund (IDF) mainly targeting early marriages and land grabbing for orphans and widows (PLHIV).

A dialogue meeting between rights holders and duty bearers on Child Rights Protection

The Orphans Skills and Household Improvement is a project:

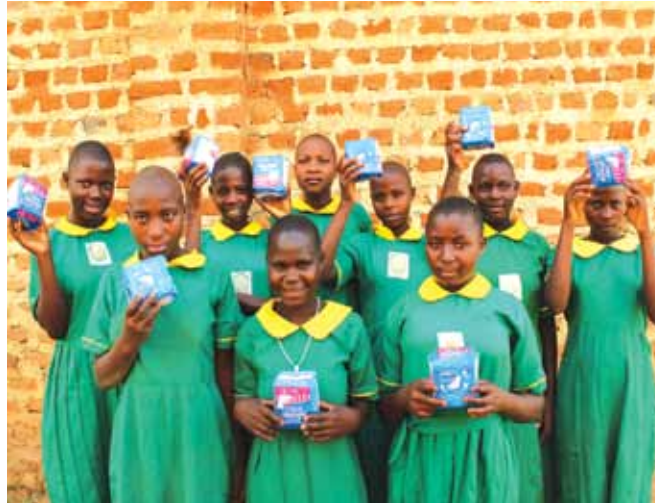

Funded by Children in Africa (BiA) operating in Lyantonde and Rakai Districts. The project aims at improved living conditions among Orphans, Vulnerable Children and People Living with HIV/AIDS. This enabled the construction of 3 houses, 3 latrines and facilitated Camps where Orphans and Vulnerable Children share experiences.

Orphans and Vulnerable Children during sharing

During the year, RACOBABO implemented other projects:

Global giving provided goats for rearing to enable orphans buy scholastic materials and providing sanitary pads to keep young girls in school.

Some of the young girls of Kempega Primary School that are kept in school by providing sanitary pads to them.

Marsha and Michael supported 3 Vulnerable Children with School Fees and Scholarstic materials.

Open Door Project - Uganda (ODPU)

Provided Goats to Vulnerable Children and Orphans for rearing.

Orphans receiving goats

Most of these projects are ongoing and will run into 2014 and beyond.

The Village Savings and Loans Associations are improving people's lives: A story from Rosemary

Namboze Rosemary aged 46 yrs is a person living with HIV/AIDS taking care of 05 children. She is a VSLA member found in Nkoote village, Wabusaana parish, Kinuka sub-county in Lyantonde district. Rosemary is a hardworking lady with a positive attitude, she likes learning and discovering new things, always wished to be a good caring mother for her children but faced so many challenges including sickness and poverty.

Before the introduction of the VSLA methodology by RACOBABO for the benefit of vulnerable people in the communities, Rosemary lived in a poor house with her 05 children in which her husband abandoned her after finding out that she was HIV positive. She used to sell local beer in one of the rooms as an income generating activity. Whatever she earned was always spent on basic needs and school fees for her children. Later her poor house collapsed leading to the end of her local beer business and school for her children. She resorted to working as a casual laborer to the people in her community but all the money she could earn would

be spent on basic needs. RACOBABO introduced the VSLA methodology that also targeted the HIV infected and affected households in its struggle to increase their household income. Rosemary was also reached and joined the VSLA group.

Rosemary standing next to her newly constructed business house in Nkoote Business Centre.

Rosemary was able to save on a weekly basis and later came up with an idea of borrowing from the VSLA to resume her local beer business. She got loans from the VSLA which she invested in a local beer business, decoration materials and plastic chairs. The business was good and from the profits, she was able to construct her own business house in Nkoote trading centre and taking her children back to school.

“The first time I joined VSLA, I had fear that I wouldn't be able to save on a weekly basis but from the skills and knowledge I acquired during the trainings from RACOBABO on the VSLA methodology, I confidently started saving from the little I had. Look at the investments from the VSLA. I am now a good caring mother for my children. I take this opportunity to thank RACOBABO for what I am, thank you RACOBABO, Rosemary said”.

Turyasingure Felix and his sister get hope after the support from Icelandic Church Aid through RACOBABO.

Turyasingura Felix 25 years old is from Kyakyozi village, Mpumudde parish, Mpumudde sub-county in Lyantonde district. He lost his parents to HIV/AIDS in the 1990's when he was in his early teens. Felix's parents sold most the properties and house items in order to get money for medication while they were bedridden but unfortunately the parents never made it.

Felix and Edvina's Old House

*He was left with a young sister (Nahabwe Edvina 15 years) who is now in her senior two. According to Felix, **"before the death of our parents, we used to eat enough food, get medication, have beddings, have clothing and could go to school. All that stopped when our parents died. Life became very hard because we dropped out of school and found challenges in getting our basic needs to an extent of having 1 or no meal a day. We lived in a grass thatched house that was about to collapse and leaked whenever it rained."***

This made the life of these orphans so challenging as they had no money that would help them construct a new house because they were still young and the little money they got from well-wishers was always spent on basic needs.

It was through the field activities carried out in their community by the RACOBABO field assistant that these orphans were reached. With support from the Icelandic Church Aid, the orphans were supported with a new house, kitchen, water tank and a toilet. Being the elder brother, Felix resorted to casual

jobs in the community in order to pay school fees for his sister Edvina and to earn a living for both him and his sister.

Felix and Edvina's New House

"Although we still face some challenges, we can sleep safely and plan for the next day happily. Thank you RACOBABO because you have given us hope with an improved quality of life" said Felix.

Out to Protect Child Rights

On Thursday, August 29, 2013, RACOBABO launched a project known as Strengthening Community based Child Rights Protection with support of the Independent Development Fund.

This project aims at addressing violation of children rights such as forced early marriage, defilement, denial of right to property, psychological/ emotional torture. These are the commonest child rights violations in Lyantonde district and impact negatively on the enjoyment of the rights of children especially of those coming from vulnerable families.

The violations are as a result of several factors such as lack of knowledge and awareness of the community on child rights and inadequate capacity protect and address child rights abuses by duty bearers such as the police, community development officers, local, religious, and cultural leaders.

Therefore through this project, the capacity of Duty bearers including Local government, traditional and religious institutions is strengthened to take actions towards effective elimination of child rights abuses.

Lyantonde District stakeholders during the launch of the Community Based Child Rights Protection Project.

On the other hand, rights holders in particular Orphans and Vulnerable Children are empowered to claim for their rights and challenge all forms of rights violations that predispose them to further vulnerability.

The launch was attended by different local leaders such as the Resident District Commissioner, Chief Administrative Officer, Chair persons L.C.III, District Education Officer, District Health Officer,

District Security Officer, District Probation Officer, and the Police Family and Welfare officer.

The participants made action plans that are followed to protect child rights, address violation of children rights and pledged to play their roles for a successful Child Rights Protection Project in Lyantonde district. RACOBABO would like to thank IDF for this partnership.

An emotionally and psychologically tortured orphan

Kitchen Gardens improving ART adherence to People Living with HIV/AIDS. A story from Scovia.

Mrs. Scovia is a 33 year old lady who lives in Lugalama village, Wabusaana parish, Kinuuka sub-county in Lyantonde district. Mrs. Scovia and her husband are both Persons Living with HIV/AIDS with 06 children (03 boys and 03 girls) of which 02 children are HIV positive.

Scovia's husband standing next to their kitchen garden.

Scovia began falling sick on and off until she got an idea of going to Kinuuka Health Centre III to test

for HIV. According to the results, she tested HIV positive and was enrolled on ART in 2012 after experiencing a low CD4 count. At the same time, she had several opportunistic infections which resulted in being bed ridden for 5 months. When she started ART, her condition improved steadily.

In 2013, Scovia benefited from the Kitchen Garden project. The RACOBABO Community Based Trainer helped her prepare a vegetable kitchen garden that included greens and egg plants after realizing that she was very weak due to poor nutrition. The purpose of preparing her a kitchen garden was to enable her family get vegetables to boost their nutrition which was also a recommendation from the medical practitioners.

Scovia was successful with her kitchen garden because her family was able to feed from the vegetables. The variety of vegetables helped to improve her nutrition hence reducing the side effects of ARV drugs. Presently, Scovia is healthy, does farming and house work activities.

"This kitchen garden has helped me a lot both economically and health wise because I no longer go to the market in search of vegetables since I have them in my kitchen garden. This has helped me save my little money for other basic needs, improve my nutrition as well as for my children and husband. I will continue taking care of the kitchen garden and add some other new types of vegetables in it because it saved my life" Scovia said.

Scovia picking vegetables from her garden.

The Safe Sail Boat making it easy to reach people around the landing sites of L.Kacheera.

RACOBABO purchased a motor boat to make it easier to move efficiently to remote fishing communities to increase access of those communities to HIV prevention services such as HCT, Safe Male Circumcision, condom use, treatment of STIs e.t.c. Fisher folks are seen as one of the communities at a high risk of spreading and acquiring HIV/AIDS. Due to the poor water transport means on Lake Kacheera, it is difficult for health workers to reach

the fisher folks at the 5 landing sites in their efforts to carry out HIV counseling and testing services. The boat sails to the 5 landing sites (Katete, Mukokote, Lwebiriba, Lwanga and Kabumba) of Lake Kacheera which are at the shortest distance 7 Kilometers away from Lwamaggwa Health center III.

It has often been used during the out reaches to mobilize fishing communities. Of special interest are fisher men in the lake as they catch fish since

they often miss out on the normal HIV services that take place during day time while they fish. The safe sail boat has attracted so many fisher folks. It has attracted large numbers compared to two years ago. This has given health workers the opportunity to sensitize them about the; Importance of HCT, Importance of condom use, sexuality and life skills, stigma and discrimination, and detection and treatment of STIs.

A man testing for HIV/AIDS at Lwanga Landing site.

Health workers landing at Lwanga Landind site to carry out HIV Counselling and testing services.

Community members of Kabumba Landing Site accessing HIV counselling and testing services

Duty Bearers Act: A story from Johnson.

Johnson is the Officer in Charge at Kaliiro Police Station. Having participated in the dialogue meetings for the Community duty bearers who came up with action plans on Child Rights Protection, Johnson was able to protect Daphine's rights.

Here is his story:

On 10/11/2013, I was in my office conducting my daily activities. Suddenly I received a call from Mr. Job Rwahonire a Community Based Advocacy Group (CBAG) member who was trained by Rural Action Community Based Organization (RACOBABO), to do Child rights Promotion and Protection in Kaliiro Sub-county. He told me that some parents were giving away an under aged girl of 15 years by the names of Daphine, a daughter to Mr & Mrs. Tizihwaho from Kyalwandemu village, Kiyinda Parish in Kaliiro Sub-

county.

After the call, I immediately informed my colleagues at the Police Station about the information I had received from the CBAG member and requested them to work with me in order to save an innocent child. We rushed to the scene and at our arrival the parents became suspicious and sent someone to stop us claiming that they were in a clan meeting solving family issues. We insisted because we had already received the right information and asked the head of the family to stop the function who also refused saying they had hosted their clan heads. On a tip off from one community member, we entered the room from where Daphine was being prepared and found the young girl smartly dressed in a traditional female suit. We cancelled the give away and took both the girl's and the wouldbe groom's parents with us to Police.

After long interrogation, Daphine's father revealed that he was giving out his daughter because of the pressure from Daphine's step mother who never wanted to see her in their home. So he had

Johnson, The Officer in Charge at Kaliiro Police Station

to find ways of getting his daughter a safe place to live - and that was through marrying her off. I put them under Police surveillance for 3 weeks and later cautioned them not to risk marrying Daphine off again. I handed her over to her Auntie whom I also warned not to attempt forcing the girl into marriage. Daphine is now happily living with her Auntie and is back to School.

ORGANISATIONAL CAPACITY ASSESSMENT AT RACOBABO:

RACOBABO conducted an OCA from Tuesday, December 10, 2013 to Saturday, December 15, 2013. Since 2008, RACOBABO had never gone through a comprehensive capacity assessment exercise to help identify its strength and weaknesses. This is always aimed at helping the organization focus itself into the future.

The gradual shift from a needs based approach into rights based programming coupled with new alliances with some strategic national partnerships have been cultivated to push RACOBABO into meaningful district level as well as national level lobby and advocacy efforts. The OCA was a welcome tool to help define RACOBABO's capacity needs to dwell into this role

RACOBABO also foresaw significant changes in future occasioned by the impending shift out of Rakai/Lyantonde of DanChurchAid; RACOBABO's longest major donor. This shift is expected to be completed by 2018. The withdrawal of this funding partner will have strong implications on RACOBABO programs because DanChurchAid currently funds about 45% of RACOBABO operational budget annually.

Therefore this capacity assessment sought among others to underscore the internal mechanisms available to bridge a major funding gap that might be created.

The OCA specifically aimed at the following objectives;

To define the critical success factors that will influence RACOBABO's future performance and to identify and set relevant indicators for measuring and evaluating RACOBABO competency.

Participants in the OCA meeting

Generate a pool of data which will lead RACOBABO into an action planning phase that provides the organization with an opportunity to set change strategies most appropriate to our environment in a bid to be more relevant to the community and become self-sustaining in the future.

Provide continual learning processes that allow RACOBABO to monitor change, track the effectiveness of the capacity-building efforts, and integrate new learning methodologies as RACOBABO needs change and capabilities increase.

The information gathered through the Organizational Capacity Assessment (OCA) processes will be used to draft a transition framework/plan that will be used to prepare RACOBABO staff, management, and Board in the eventual withdrawal of funding by DanChurchAid by 2018.

The OCA exercise helped generate a comprehensive capacity development plan looking at the organisation as a whole. We call upon all partners; to support this plan to enable RACOBABO's growth.

FUG PROVIDES AN OPPORTUNITY TO RACOB AO FOR EXTENDING ITS SERVICES TO SSEMBABULE

2013 has seen the end of the FUG funded project. This two year project that started in 2012 aimed at improving access to ART treatment in Lyantonde district . The FUG project among other things has built the capacity of health workers in ART treatment provision which has supported the district health department to score into its major target of accrediting health centre IIIs as permanent ART sites. This brought ART services nearer to the communities ultimately leading to increased accessibility of health services especially ART services by the poor.

The impact of this project has not only been tremendous to the people of Lyantonde but also gives hope to the people of Ssembabule district . This is due to the fact that FUG has accepted RACOB AO to replicate the same project to the neighboring district of Ssembabule . Therefore, 2013 has been a spring board to RACOB AO to extend its services to Ssembabule district . The entire staff at RACOB AO are enthusiastic towards working with peo-

ple of Ssembabule towards improved access to ART services in the district come the year 2014

FUG VISIT TO RACOB AO:

RACOB AO received 02 visitors from Pharmacists without Borders i.e. Mr. Lars and Mrs. Lars that had come to monitor the work done by RACOB AO in its project activities of supporting AIDS patients on ARVS to adhere to treatment in the sub-counties of Kinuka and Mpumudde.

Mr. & Mrs. Lars posing with a PLHIV group of Lugarama village, Kinuuka sub-county.

STAFF NEWS:

During the year, RACOB AO appointed 02 new staff members i.e. the Documentation Officer Ms. Babirye Josephine and a Field Officer Mr. Waswa Samuel.

RACOB AO Staff Members

FUNDING SOURCES:

We are grateful to the following donors who gave us the resources to implement several projects in the year 2013. Below is a list of donors and their contributions;

| Name of donor | Country | Amount Given (UGX) |
|--|--|---------------------------|
| <i>Dan Church Aid (DCA)/Danida</i> | <i>Denmark</i> | <i>314,433,812</i> |
| <i>Icelandic church Aid (ICA)</i> | <i>Iceland</i> | <i>8,874,625</i> |
